EDUCATION

Bachelor of Science in Computer Science

Sep 2022 – Present

University of Calgary

Calgary, AB

- Minor in Management and Society

EXPERIENCE

Software Developer

May 2026 – Present

Vibe By California

Part-Time Contract — Remote

- Independently architected and shipped a full-stack CRM and retail operations platform using React, FastAPI, and PostgreSQL, unifying analytics, marketing automation, and job orchestration.
- Integrated Dutchie, KayaPush, Resend, and Blackleaf APIs to synchronize customer, sales, labour, and messaging data and automate targeted SMS and email campaigns.
- Built C-suite analytics dashboards and granular **RBAC** with role-assigned permissions enforced across frontend routes and backend endpoints.

Software Developer Intern

Jan 2025 – Present

Modular Solutions

Calgary, AB

- Championed a JavaScript rule sandbox solution that replaced an existing time-consuming process, saving the company approximately 8 hours of staff time per week.
- Developed full-stack features in **C#/.NET** and **React** across a DDD-based **microservice** architecture, improving maintainability and delivery speed for insurance product workflows.
- Built a **Python + LLM** solution that created a fully searchable rules knowledge base, accelerating rule development **~5x** and allowing teams to share accurate technical docs with clients.
- Delivered **30+** complex insurance rules in the JavaScript rules engine while reducing average rule implementation time by approximately **50%**.

Software Developer

Jul 2023 – Sept. 2024

Toysoft

Calgary, AB

- Architected **Kotlin**-based mobile GUI and core application logic to improve responsiveness and usability, resulting in smoother user interactions and stronger engagement.
- Developed a **Node.js** backend service to coordinate WebRTC signaling requests, enabling reliable low-latency peer-to-peer communication between clients.

TECHNICAL SKILLS

Languages: C#, Java, JavaScript, Kotlin, Python, SQL, TypeScript, HTML/CSS

Frameworks: .NET, FastAPI, Node.js, Express.js, React, Vue, Electron

Databases & Cloud: PostgreSQL, MongoDB, Firebase, AWS, Azure

Tools & AI: Docker, Git/GitHub, Linux, Claude Code, OpenAI, Ollama, vLLM, Unsloth

PROJECTS & HACKATHONS

rymo | *Electron, TypeScript*

- Engineered a local-first knowledge canvas inspired by **Miro**, enabling users to build, arrange, and connect notes, links, and media offline.
- Created a **portable JSON-based** board format with a custom encoder and decoder, ensuring data integrity and long-term interoperability across environments.
- Structured the board system around on-disk storage, giving users direct ownership and control of their data without relying on cloud infrastructure.

Hack The Change 2024, 2nd Place | *Firebase, JavaScript, React*

- Built an interactive game for mental health, integrating an **LLM** to classify user journals by tone and theme, contributing to a 2nd place finish among **50+** teams.
- Engineered a custom content moderation filter using an LLM to detect and mitigate harmful posts, ensuring a safe community environment for users.
