EDUCATION

Bachelor of Science in Computer Science

University of Calgary

Sep 2022 – Expected 2027

Calgary, AB

- Minor in Management and Society

EXPERIENCE

Software Developer

Vibe By California

May 2026 – Present

Part-Time Contract — Remote

- Architected and shipped a full-stack CRM and retail operations platform using **React**, **FastAPI**, and **PostgreSQL** for **8** retail locations.
- Integrated Dutchie, KayaPush, Resend, and Blackleaf, reconciling **500K+** customer records and **900K+** transaction line items.
- Built C-suite analytics dashboards and platform-wide **RBAC**, enforcing scoped access across CRM, analytics, campaigns, and operations.
- Designed, provisioned, and configured a Linux VPS infrastructure stack, deploying Dockerized services including Nginx, Authentik, Nextcloud, Stalwart, Portainer, and other internal systems.

Software Developer Intern

Modular Solutions

Jan 2025 – Present

Calgary, AB

- Built a JavaScript rule sandbox that replaced a manual workflow, saving **8** staff hours/week.
- Shipped **10+** production full-stack features in **C#/.NET** and **React** across a DDD-based microservice architecture.
- Built a **Python + LLM** rules knowledge base for internal teams and client-facing documentation, accelerating rule development **5x**.
- Delivered **30+** production insurance rules in Javascript, reducing average implementation time by **50%**.

TECHNICAL SKILLS

Languages: C#, Java, JavaScript, Python, SQL, TypeScript, HTML/CSS

Frameworks: .NET, FastAPI, Node.js, Express.js, React, Vue, Electron

Databases & Cloud: PostgreSQL, MongoDB, Firebase, AWS, Azure

Tools & AI: Docker, Git/GitHub, Linux, Claude Code, OpenAI, vLLM, Unsloth

PROJECTS & HACKATHONS

rymo | *Electron, TypeScript, Kotlin Multiplatform*

- Engineered a local-first knowledge canvas inspired by **Miro**, supporting Kanban boards, Markdown, freehand drawing, PDF editing, notes, links and more.
- Created a **portable JSON-based** board format with a custom encoder and decoder, ensuring data integrity and long-term interoperability across environments.
- Built a mobile companion application that brings drawing and core workspace features to handheld devices, using the desktop app as the source of truth for secure real-time synchronization.

Hack The Change 2024, 2nd Place | *Firebase, JavaScript, React*

- Shipped an LLM-powered mental-health game that classified journal entries by tone and theme, placing **2nd among 50+ teams**.
- Built an LLM-powered content moderation pipeline to classify and filter harmful user-generated content.
